

Fyodor Nedbalskiy

FRONTEND DEVELOPER

About me

Hello! My name is Fedor, I am a front-end developer. I try to constantly develop in my profession and learn new technologies. At the moment I am familiar with HTML, CSS, JavaScript, as well as libraries and frameworks such as React. I am passionate about creating user interfaces and try to make them as user-friendly and attractive as possible. I also know how to work with Git and have experience working in a team. I am aiming for a long-term career in front-end development and am ready for new challenges and challenges.
